Experience

Dainik Bhaskar (DB Corp Ltd.) — Data Analytics Intern

May 2026 – July 2026

- Analyzed **7,043 customer records** across **20 attributes** using **Python, Pandas, NumPy, Matplotlib, and Seaborn**, performing data cleaning, **EDA**, feature engineering, encoding, and scaling.
- Developed and compared **5 classification models** using **Scikit-learn**; evaluated with Accuracy, Precision, Recall, F1-score, and Confusion Matrix, improving churn recall from **0.55 to 0.72** through threshold tuning.
- Developed and deployed an interactive **Streamlit** application integrating the trained **Logistic Regression** model using **Joblib** for real-time churn prediction, risk classification, and feature-importance visualization.

Projects

Customer Churn Analysis & Prediction System

GitHub | Live Demo

- Built a **machine learning** pipeline to predict telecom customer churn using customer demographics, billing information, and service subscription features.
- Identified key factors linked to customer churn, including tenure, contract type, internet service, and monthly charges, through **exploratory data analysis (EDA)** and feature-importance analysis.
- Developed and deployed an interactive **Streamlit** application for real-time churn probability prediction and visualization of churn-related features.

Satellite Land Cover Classification – ML & CNN

GitHub

- Classified **EuroSAT** satellite images into **10 land cover types**, including agricultural, residential, and industrial zones, using **Random Forest** and **CNN** models.
- Designed preprocessing pipeline for image normalization and augmentation; **CNN** preserved spatial features while **Random Forest** provided a strong baseline.
- Conducted evaluation with accuracy metrics, confusion matrices, and error analysis; **CNN achieved 90–95% accuracy** across different training epochs.

Fact vs Opinion Detection – Classical ML & BiLSTM

GitHub

- Implemented fact–opinion classification on **MPQA Dataset** with **10,000 samples**, comparing **TF-IDF** based Classical ML models with **BiLSTM**.
- Achieved **91.7% accuracy with BiLSTM**; validated results with **5-fold cross-validation**, highlighting deep learning's strength in sequential text.
- Applied **McNemar statistical test** to confirm significance; demonstrated BiLSTM's advantage while emphasizing classical ML's competitiveness on structured datasets.

Education

Birla Institute of Technology, Mesra

Sept 2023 – May 2027

B.Tech in Computer Science Engineering — CGPA: 7.16/10

Technical Skills

Languages: Python, SQL, C++, Java

Data Analysis: Pandas, NumPy, Excel, Power BI, EDA, Data Visualization

Machine Learning: Regression, Classification, Feature Engineering, Model Evaluation

Libraries: Scikit-learn, TensorFlow, Matplotlib, Seaborn

Tools: Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Streamlit

Extracurricular Activities

SPWF — Web Content Writer Intern

Nov 2025 – Feb 2026

Contributed articles for awareness programs and supported digital content creation.

National Service Scheme (NSS) Volunteer

Sept 2023 – Apr 2025

Organized initiatives including Sanitary Pad Distribution and Breast Cancer Awareness Drives.

Creative Writing: Authored short stories and poems; prize winner in multiple essay/article competitions.
